You may want to use your own images (although the images that I've collected are simply smashing).

If using your own images;

1) They should be good quality photo copies,

2) The image should be sized to fit the glass pieces.
   For example: 3"x5" piece listed in the class description, select an image that is slightly smaller than 3"x5". The beveled glass sizes available for you to choose from: 3"x5", 1"x3", 1.5"x1.5", 1"x1".
