Audio-Ch. 10

Objective: To correctly pronounce and spell the medical terms dictated on the audio.

Pronunciation Instructions

1. As you listen to the audio recording, you will hear the combining form and its meaning presented. Next you will hear a presentation of a medical term that incorporates the combining form along with its definition. Finally, you will hear the medical term repeated followed by a pause. For example, in the Digestive System chapter, you will hear the following: “or/o means mouth. Or/al means pertaining to the mouth. Oral (pause).”

2. During the pause, say the medical term to help you learn its correct pronunciation. I also recommend that you follow along with the text on your screen as you say the term aloud.
