

Evidence to Support Unit Value Proposal per Academic Senate Resolution F18-E

Unit Value

The official position the Academic Senate is that the standard unit value for courses intended for general education will be the unit value on the C-ID descriptor in the “minimum unit” field OR the median unit value among California Community Colleges if higher than the C-ID minimum.

In order to meet the CCC median of higher units, more than half of the CCCs must offer the proposed course at the higher unit value. We recognize some colleges may not offer the course, so median will be determined based on number of CCCs that do. Additionally, it is recommended that the C-ID descriptor for the course be submitted along with any supporting search documents, such as [ASSIST searches](#), or a [C-ID designation course search](#).

Here is a list of colleges that offer:

Course ID and Title of Course:

CSU/UC Comparability

Provide at least two courses of comparable unit value or comparable contact hours are offered at CSUs OR UCs, OR absent comparable courses, match the median unit value among California Community Colleges.

Provide the university, course, and link to catalog:

- 1.
- 2.

ADT Collaboration

In cases where a course meets a major requirement in two or more ADTs and the proposed unit value is different than listed in the current ADT, that the discipline writing or reviewing the course outline of record **MUST** collaborate with any other affected discipline before it can determine a unit value above the minimum units stated on the C-ID descriptor for that course.
