

FFA Advisors:

Last evening, in an unexpected development, Governor Newsom announced new guidance requirements that Californians should cancel or postpone events of more than 250 people, through the end of March.

Due to circumstances beyond our control and with great disappointment, we regret to announce that we must cancel the 2020 MJC FFA Field Day. Modesto Junior College must follow the safety protocols surrounding the Corona Virus outbreak. Our faculty, staff, and students have devoted countless hours to developing quality contests that show our commitment to your students. I also recognize that your students have spent countless hours in preparation of their contests. Please know that we share your in disappointment. In the meantime, please feel free to distribute this information as necessary to all concerned parties, and we will began the process of refunding your registration fees.

We hope you and your students will join us for future events on our campus. Our MJC Agriculture family values secondary agricultural programs and we look forward to supporting your students in the future.
