1. *Welcome Curtis Martin* (Academic Senate President) to today's OAW meeting: Members, feel free to discuss your concerns with Curtis, and he'll guide you in making official recommendations to the Academic Senate.
2. *Update on Distributions:* Amanda is working on this. With software updates and newer options available in eLumen, the older assessments are being revised.
3. *There'll be data-entry labs in December and January* (will be announced soon). Reps, please tell your departments that every faculty member who's scheduled to enter data will get full support from Nita. All they have to do is send Nita an email at [gopaln@yosemite.edu](mailto:gopaln@yosemite.edu).
4. As of now, as Amanda distributes assessments to sections, she's also notifying division coordinators and department coordinators. She and I don't know if this is a good idea or if it's intrusive to coordinators. Perhaps you can take a moment to discuss the following: *Should notifications go only to faculty who're assessing, or should they go to the coordinators as well?*
5. I'm discussing with eLumen the possibilities of a FLEX day in spring where eLumen and Instructure can show us *how the new Canvas-eLumen relationship will work*. I'll inform you of this as soon as I get some information. 2018 could be the year where we use SLO data meaningfully and without putting any extra effort to derive that meaning.
6. As you come up with questions and ideas during your meeting or before or after, please record them here:
