

## Report to Senate Executive

MJC

September 28, 2017

----Nita Gopal

(SLO coordinator 2015 fall –fall 2017)

### Subject: eLumen-Canvas Integration Webinar

- A thirty-minute webinar
- eLumen and Canvas showed us a prototype of the developing integration between the two systems.
- They're aiming to bring us an automated data flow between the two systems.
- The eLumen-Canvas integration is the biggest integration there is in terms of Canvas's associations with other companies.
- Their idea is to draw the SLOs from eLumen into Canvas, have the grading completed in Canvas, and draw that data back into eLumen.
- There are several models of eLumen, and the one we looked at today had Curriculum and the student view active in it.

#### In General:

The importance given to the integration by the two companies (eLumen & Canvas) shows that innovative ideas in understanding student learning.
